Chapter 1

What is corporate finance?

- Section 1 The financial manager is first and foremost a salesman...
- Section 2 ... of financial securities...
- Section 3 ... valued continuously in the financial markets.
- Section 4 Most importantly, he is a negotiator...
- Section 5 ... and he remembers to do an occasional reality check!

Summary, questions, exercises and bibliography

SECTION 1

FINANCIAL ANALYSIS

Part 1

FUNDAMENTAL CONCEPTS IN FINANCIAL ANALYSIS

Chapter 2

Cash flows

- Section 1 Operating and investment cycle
- Section 2 Financial resources

Summary, questions, exercises and bibliography

Chapter 3

Earnings

- Section 1 Additions to wealth and deductions to wealth
- Section 2 Different income statement formats

Summary, questions, exercises and bibliography

Chapter 4

Capital employed and invested capital

- Section 1 The balance sheet: definitions and concepts
- Section 2 The capital-employed analysis of the balance sheet
- Section 3 A solvency-and-liquidity analysis of the balance sheet
- Section 4 A detailed example of a capital-employed balance sheet

Summary, questions, exercises and bibliography

Chapter 5

Walking through from earnings to cash flow

- Section 1 Analysis of earnings from a cash flow perspective
- Section 2 Cash flow statement

Summary, questions, exercises and bibliography

Chapter 6

Getting to grips with consolidated accounts

- Section 1 Consolidation methods
- Section 2 Consolidation-related issues
- Section 3 Technical aspects of consolidation

Summary, questions, exercises and bibliography

Chapter 7

How to cope with the most complex points in financial accounts

- Accrual in the income statement
- Construction contracts
- Convertible bonds or loans
- Currency translation adjustments
- Deferred tax assets and liabilities
- Dilution profits or losses
- Exchangeable bonds
- Goodwill
- Intangible fixed assets
- Inventories
- Leases
- Mandatory convertible bonds
- Off-balance sheet commitments
- Preference shares
- Perpetual subordinated loans or notes
- Provisions
- Stock option
- Tangible fixed assets
- Treasury shares

Part 2

FINANCIAL ANALYSIS AND FORECASTING

Chapter 8

How to perform a financial analysis

- Section 1 What is financial analysis?
- Section 2 Economic analysis of companies
- Section 3 An assessment of a company's accounting policy
- Section 4 Standard financial analysis plan
- Section 5 The various techniques of financial analysis
- Section 6 Ratings
- Section 7 Scoring techniques
- Section 8 Expert systems

Summary, questions, exercises and bibliography

Chapter 9

Margin analysis: structure

- Section 1 How operating profit is formed
- Section 2 How operating profit is allocated
- Section 3 Financial assessment
- Section 4 Pro forma income statements (individual and consolidated accounts)
- Section 5 Case study: Ericsson

Summary, questions, exercises and bibliography

Chapter 10

Margin analysis: risks

- Section 1 How the operating leverage works
- Section 2 A more refined analysis provides greater insight
- Section 3 From analysis to forecasting: the concept of normative margin
- Section 4 Case study: Ericsson

Summary, questions, exercises and bibliography

Chapter 11

Working capital and capital expenditures

- Section 1 The nature of working capital
- Section 2 The working capital turnover ratios
- Section 3 Reading between the lines of working capital
- Section 4 Analysing capital expenditures
- Section 5 Case study: Ericsson

Summary, questions, exercises and bibliography

Chapter 12

Financing

- Section 1 A dynamic analysis of the company's financing
- Section 2 A static analysis of the company's financing
- Section 3 Case study: Ericsson

Summary, questions, exercises and bibliography

Chapter 13

Return on capital employed and return on equity

- Section 1 Analysis of corporate profitability
- Section 2 Leverage effect
- Section 3 Uses and limitations of the leverage effect
- Section 4 Case study: Ericsson

Summary, questions, exercises and bibliography

Chapter 14

Conclusion of financial analysis

- Section 1 Solvency
- Section 2 Value creation
- Section 3 Financial analysis without the relevant accounting documents
- Section 4 Case study: Ericsson

Summary, questions, exercises and bibliography

SECTION TWO

INVESTMENT ANALYSIS

Chapter 15

The financial markets

- Section 1 The rise of capital markets
- Section 2 The functions of a financial system
- Section 3 The relationship between banks and companies
- Section 4 From value to price (1): financial communication
- Section 5 From value to price (2): the efficient markets
- Section 6 Limitations in the theory of efficient markets
- Section 7 Investors' behaviour

Summary, questions, exercises and bibliography

Part 1

INVESTMENT DECISION RULES

Chapter 16

The time value of money and net present value (NPV)

- Section 1 Capitalisation
- Section 2 Discounting
- Section 3 Present value and net present value of a financial security
- Section 4 The NPV decision rule
- Section 5 What does net present value depend on?
- Section 6 Some examples of simplification of present value calculations

Section 7 Special NPV topics

Summary, questions, exercises and bibliography

Chapter 17

The internal rate of return (IRR)

Section 1 How is internal rate of return determined?

Section 2 Internal rate of return as an investment criterion

Section 3 The limits of the internal rate of return

Section 4 Some more financial mathematics: interest rate and yield to maturity

Summary, questions, exercises and bibliography

Chapter 18

Incremental cash flows and other investment criteria

Section 1 The predominance of NPV and the importance of IRR

Section 2 The main lines of reasoning

Section 3 Which cash flows are important?

Section 4 Other investment criteria

Summary, questions, exercises and bibliography

Chapter 19

Measuring value creation

Section 1 Accounting criteria

Section 2 Economic criteria

Section 3 Market criteria

Section 4 Putting things into perspective

Summary, questions, exercises and bibliography

Chapter 20

Risk and investment analysis

Section 1 A closer look at risk

Section 2 The contribution of real options

Summary, questions, exercises and bibliography

Part 2

THE RISK OF SECURITIES AND THE COST OF CAPITAL

Chapter 21

The risk and return of securities

Section 1	Sources of risk
Section 2	Risk and the fluctuation in the value of a security
Section 3	Tools for measuring return and risk
Section 4	How diversification reduces risk
Section 5	Portfolio risk
Section 6	Measuring how individual securities affect portfolio risk: the beta coefficient
Section 7	Choosing among several risky assets and the efficient frontier
Section 8	Choosing between several risky assets and a risk-free asset: the capital market line
Section 9	How portfolio management works

Summary, questions, exercices and bibliography

Chapter 22

The cost of equity

Section 1	Return required by investors: the CAPM ¹
Section 2	Properties of the CAPM
Section 3	The limits of the CAPM model
Section 4	Multi-factor models
Section 5	The cost of equity based on historical returns
Section 6	The cost of equity based on current market prices

Summary, questions, exercices and bibliography

Chapter 23

From the cost of equity to the cost of capital

Section 1	The cost of capital and the β of assets
Section 2	Alternative methods for estimating the cost of capital
Section 3	Some practical applications
Section 4	Can corporate managers influence the cost of capital?
Section 5	Cost of capital: a look at the evidence

Summary, questions, exercices and bibliography

Chapter 24

The term structure of interest rates

Section 1	Fixed-income securities and risk
Section 2	The different interest rates curves
Section 3	Relationship between interest rates and maturities
Section 4	The stochastic approach to modelling the rate structure
Section 5	A flashback

Summary, questions, exercices and bibliography

¹ See also the appendix of this chapter for a formal derivation of the CAPM.

SECTION THREE

CORPORATE FINANCIAL POLICIES

Part 1

FINANCIAL SECURITIES

Chapter 25

Enterprise value and financial securities

- Section 1 A completely different way of looking at things
- Section 2 Debt and equity
- Section 3 Overview of how to compute enterprise value
- Section 4 Valuation by discounting free cash flow

Summary, questions, exercises and bibliography

Chapter 26

Debt Securities

- Section 1 Basic Concepts
- Section 2 The yield to maturity
- Section 3 Floating-rate bonds
- Section 4 Other debt securities
- Section 5 The volatility of debt securities
- Section 6 Default risk and the role of rating

Summary, questions, exercises and bibliography

Chapter 27

Other Debt Products

- Section 1 General features of corporate financing
- Section 2 Marketable debt securities
- Section 3 Bank Debt products
- Section 4 Leasing
- Section 5 Project financing
- Section 6 Investment of cash

Summary, questions, exercises and bibliography

Chapter 28

Equity

- Section 1 Basic concepts
- Section 2 P/E
- Section 3 Key market data
- Section 4 Adjusting per share data for technical factors

Summary, questions, exercises and bibliography

Chapter 29

Options

- Section 1 Definition and theoretical foundation of options
- Section 2 Mechanisms used in pricing options
- Section 3 Analysing options
- Section 4 Parameters to value options
- Section 5 Methods for pricing options
- Section 6 Tools for managing an options position

Summary, questions, exercises and bibliography

Chapter 30

Hybrid securities

- Section 1 Warrants
- Section 2 Convertible bonds
- Section 3 Preference shares
- Section 4 Other hybrid securities

Summary, questions, exercises and bibliography

Chapter 31

Selling securities

- Section 1 General principles in the sale of securities
- Section 2 Initial public offerings
- Section 3 Capital increases
- Section 4 Block trades of shares
- Section 5 Bonds
- Section 6 Convertible and exchangeable bonds
- Section 7 Syndicated loans

Summary, questions, exercises and bibliography

Part 2

CAPITAL STRUCTURE POLICIES

Chapter 32

Value and corporate finance

- Section 1 The purpose of finance is to create value
- Section 2 Value creation and markets in equilibrium
- Section 3 Value and organisation theories
- Section 4 How can we create value?
- Section 5 Value and taxation

Summary, questions, exercises and bibliography

Chapter 33

Capital structure and the theory of perfect capital markets

- Section 1 The evidence from the real-world
- Section 2 The capital structure policy in perfect financial markets

Summary, questions, exercises and bibliography

Chapter 34

The trade-off model

- Section 1 The benefits of debt
- Section 2 The costs of debt
- Section 3 The trade-off model

Summary, questions, exercises and bibliography

Chapter 35

Debt, Equity and options theory

- Section 1 Analysing the firm in light of options theory
- Section 2 Contribution of the options theory to the valuation of equity
- Section 3 Using options theory to analyse a company's financial decisions
- Section 4 Resolving conflicts between shareholders and creditors

Summary, questions, exercises and bibliography

Chapter 36

Working out details: the design of the capital structure

- Section 1 The major concepts
- Section 2 Competitors, life cycle and the 'extended trade-off' model
- Section 3 Other factors affecting the capital structure choice
- Section 4 Effects of the financing choice on accounting and financial criteria
- Section 5 Working out details of the capital structure
- Section 6 Capital structure policies: a look at the evidence

Summary, questions, exercises and bibliography

Part 3

EQUITY CAPITAL AND DIVIDEND POLICIES

Chapter 37

Internal Financing: Reinvesting cash flow

- Section 1 Reinvested cash flow and the value of equity
- Section 2 Internal financing and the various stakeholders
- Section 3 Internal financing and return criteria

Summary, questions, exercises and bibliography

Chapter 38

Returning value to shareholders: dividend policies

- Section 1 Dividends and market value
- Section 2 Dividend distribution in practice
- Section 3 Share buy-backs and capital reduction
- Section 4 Taxation of dividends, share buy-backs and capital reduction

Summary, questions, exercises and bibliography

Chapter 39

Capital Increases

- Section 1 A definition of capital increase
- Section 2 Capital increases and finance theory
- Section 3 Old and new shareholders
- Section 4 Capital increases and financial criteria

Summary, questions, exercises and bibliography

SECTION FOURTH

FINANCIAL MANAGEMENT

Part 1

VALUATION AND FINANCIAL ENGINEERING

Chapter 40

Valuation

- Section 1 Overview of the different methods
- Section 2 Premiums and discounts
- Section 3 Valuation by discounted cash flow
- Section 4 Multiple approach or peer-group comparisons
- Section 5 The sum-of-the-parts method and restated net asset value (RNAV)
- Section 6 Comparison of valuation methods

Summary, questions, exercises and bibliography

Chapter 41

Choice of Corporate Structure

- Section 1 Shareholder structure
- Section 2 Initial Public Offerings (IPO) and corporate governance
- Section 3 How to strengthen control over a company
- Section 4 Financial securities' discounts
- Section 5 Organising a diversified group

Summary, questions, exercises and bibliography

Chapter 42

Taking control of a company

- Section 1 The Rise Of Mergers And Acquisitions
- Section 2 Choosing a negotiating strategy
- Section 3 Taking over a listed european company

Summary, questions, exercises and bibliography

Chapter 43

Mergers And Demergers

- Section 1 All-Share Deals
- Section 2 The mechanics of all-share transactions
- Section 3 Demergers and Split-offs

Summary, questions, exercises and bibliography

Chapter 44

LBOs

- Section 1 LBO structures
- Section 2 The players
- Section 3 LBOs and financial theory

Summary, questions, exercises and bibliography

Chapter 45

Bankruptcy and Restructuring

- Section 1 Why companies go bankrupt?
- Section 2 Bankruptcy and financial theory
- Section 3 An illustrative example of financial restructuring

Summary, questions, exercises and bibliography

Part 2

MANAGING NET DEBT AND FINANCIAL RISKS

Chapter 46

Managing cash flows

- Section 1 Basic tenets
- Section 2 Cash management
- Section 3 Cash management within a group
- Section 4 Investment of cash

Summary, questions, exercises and bibliography

Chapter 47

Off Balance Sheet Financing

- Section 1 Reasons For Using Off-balance sheet products
- Section 2 Main techniques
- Section 3 Accounting treatment
- Section 4 Consequences for financial analysis

Summary, questions, exercises and bibliography

Chapter 48

Managing Financial risks

- Section 1 The various sources of financial risk
- Section 2 Measuring financial risks
- Section 3 Principles of financial risk management
- Section 4 Organised markets versus OTC Markets

Summary, questions, exercises and bibliography
